

Vasyl Raiskyi

Android Developer

PROFILE

Versatile Developer specialized in tailoring digital solutions across Android Mobile, Android TV, and Telegram platforms. Committed to professional excellence, I leverage cutting-edge tools to transform complex ideas into stable, user-centric products.

EXPERIENCE

Android Developer

- Self Employed | Play Market
Nov 2025 – Present

Designed, developed, and published a portfolio of high-utility Android and Android TV applications on Google Play, focusing on networking, system utilities, and developer tools. Managed the entire product lifecycle from initial architecture to Google Play Store deployment.

Python Developer

- Inversus Crypto
Nov 2024 – Nov 2025

Telegram CRM bot for automation system with client management, task tracking, currency conversion, transaction monitoring, and broadcast tools. Integrated with database and external APIs for real-time operations. Deployed on a self-managed Ubuntu VPS with logging and uptime control.

Android Developer

- ANTERRA GROUP – GEORGIA
Dec 2019 – Jun 2024

TV Application Development: development, architecture refactoring, and maintenance of high-performance IPTV/OTT media players and custom Android TV launchers. Designed and optimized highly responsive, 10-foot user interfaces (Leanback, custom DPAD navigation) ensuring performance on low-end Android TV hardware and streaming sticks
